

BOISE STATE UNIVERSITY

INSTITUTIONAL RESEARCH

The Office of Institutional Research supports and advances data-informed decision making so that Boise State can continue to improve as an institution and achieve its goals as a metropolitan research university of distinction.

What We Do

- ◇ Provide expertise in research, assessment, data analysis, and interpretation
- ◇ Capture the voices of students, faculty, staff, and alumni to understand their experiences and perspectives
- ◇ Actively integrate data into campus initiatives and priorities
- ◇ Communicate reliable data in a meaningful way to educate others and accurately depict the university story
- ◇ Oversee reporting of institutional data to external entities
- ◇ Monitor and communicate institutional performance through benchmarking and comparative and trend analyses
- ◇ Foresee trends and issues in higher education and proactively engage with the university community on these matters

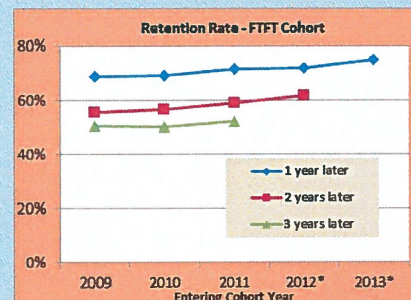

How We Help

- ◇ Department-level results of the Alumni, Advising and Graduating Student surveys
- ◇ Data and information needed for Periodic Review, disciplinary accreditations, and grant submissions
- ◇ Official University data, such as enrollment, retention, and graduation rates
- ◇ Training on the faculty activity reporting system, Digital Measures, and the Pyramid analytics reporting system

- ◇ Understanding data from the Delaware Study
- ◇ Department-specific data about student success and progression (i.e., the “fate/source” data)
