

Bottleneck Courses and their Departments, 2010-11 to 2015-16

In the fall and spring terms of 2015-16, Boise State University offered 955 lower division courses and 1,783 upper division courses at the undergraduate level as of tenth day. After eliminating courses with a low capacity, 879 lower division and 1,591 upper division courses remained. Of these, 72 lower division and 144 upper division courses were over capacity (>100% enrollment) and/or had a waitlist of 5 or more to enroll in the course (see Appendices A and B).

As shown in Figure 1, lower division bottlenecks have decreased substantially over the past six years, declining from 19% in 2010-11 to a steady level of 8% in the last three years. At the upper division, the bottleneck rate averaged 12.5% in 2010-11 through 2012-13; in the most recent three years, the rate has dropped to an average of 8.6%. In short, lower division bottlenecks have decreased and stabilized, while the upper division bottlenecks have decreased but continue to fluctuate.

Each year, the Graduating Student Survey asks students whether their graduation was delayed due to course availability. Of the 2015-16 baccalaureate graduates, 19.8% reported a delay in graduation due to course availability, which is unchanged from the 2014-15 bachelor's degree graduates (19.7%). In the two years prior to that, nearly 22% of bachelor's graduates reported a delay with 21.9% in 2012-13 and 21.7% in 2013-14, suggesting some improvement in recent years. The results broken down by the department of students' majors illustrate that students across many majors reported delays in their graduation (see Appendix C).

Although the issue with bottlenecks is not resolved, Boise State has shown progress in reducing bottlenecks and the impact on students' abilities to graduate in their desired timeframe.

Appendix A. Lower division courses that were over-enrolled (capacity>100%) or waitlist of 5 or more
 Note that some courses appear multiple times because they were offered in both fall and spring.

Course	Course Title	Department	Term

Percent of baccalaureate graduates who reported their graduation was delayed due to course availability
Results from the 2015-16 Graduating Student Survey

NOTES: Departments depict the majors of students and are not necessarily the source of the perceived delays. Departments with too few respondents (<5) to the Graduating Student Survey are not shown. Surveys are summarized by year, which is defined as Summer, Fall, and Spring.
